P42212 Green fluorescent protein, Aequorea victoria, 238 residues

AlphaFold DB: model, mean pLDDT 96.6

InterPro: 7 entries or signatures

- G3DSA:2.40.155.10 Green fluorescent protein (cathgene3d): residues 1-145, 146-238
- IPR000786 Green fluorescent protein, GFP (interpro): residues 3-27, 28-48, 49-69, 70-85, 86-108, 109-129, 130-149, 150-171, 173-192, 193-211, 214-237
- IPR009017 Green fluorescent protein (interpro): residues 1-238
- IPR011584 Green fluorescent protein-related (interpro): residues 14-227
- PF01353 Green fluorescent protein (pfam): residues 14-227
- PR01229 GFLUORESCENT (prints): residues 3-27, 28-48, 49-69, 70-85, 86-108, 109-129, 130-149, 150-171, 173-192, 193-211, 214-237
- SSF54511 GFP-like (ssf): residues 2-228

MMseqs2 against Swiss-Prot 2026_03: hits its own entry (not drawn); 5 other entries above 30% identity

- Q9U6Y3 30.5% identity, E = 8.8e-20: residues 14-201
- Q9U6Y6 36.5% identity, E = 1.9e-16: residues 18-140
- Q9GZ28 32.3% identity, E = 8.5e-16: residues 12-140
- Q9U6Y7 31.2% identity, E = 3.9e-15: residues 1-140
- Q95W85 31.2% identity, E = 4.4e-14: residues 14-140

AlphaFold DB pLDDT > 90 | AlphaFold DB 70-90 | AlphaFold DB 50-70 | AlphaFold DB < 50 | the protein (residues on the line above) | InterPro match (one bar per piece) | MMseqs2 hit to another Swiss-Prot entry, > 30% identity
